**Key words.** planets and satellites: composition – planets and satellites: gaseous planets – planets and satellites: interiors – planets and satellites: physical evolution – errata, addenda

The published paper provides an incorrect width for the narrow composition profile. The published version states  $\Delta q = 0.01$ , while the true value used in the simulations was  $\Delta q = 0.001$ . The wrong value was given in Sect. 2.2., the caption of Fig. 6, and Appendix C.
